INDUSTRY: Aerospace & Defense Test and Measurement

THEMES: Rugged data acquisition systems, telemetry and rotating measurements, defense vehicle testing, distributed DAQ architectures, mobile field testing solutions and aerospace measurements.

SEGMENT: Defense and aerospace test engineers, validation teams, system integrators, R&D engineers, military vehicle manufacturers and test laboratories.

SPEAKING TOPICS:

- Rugged data acquisition solutions for defense applications
- Telemetry systems for rotating and mobile measurements
- Structural and durability testing for defense vehicles
- Mobile and field-ready DAQ systems for harsh environments
- Scalable DAQ platforms for multi-channel measurements

BIO: Antonio Perez is a Sales Specialist for imc Test & Measurement, part of Axiometrix Solutions, supporting customers and partners across the EMEA region with a strong focus on Aerospace and Defense applications.

In his current role, Antonio manages sales activities in the United Kingdom while also supporting Inside Sales operations across EMEA and representing imc within defense-related initiatives and strategic industry activities. His work includes supporting customers involved in military vehicle testing, aerospace validation, telemetry systems and distributed measurement architectures.

By combining technical understanding with commercial coordination, Antonio helps bridge the gap between engineering requirements and practical test solutions.
