Speaker Brief

INDUSTRY: Automotive, Aerospace & Defense

THEMES: Acoustic testing, noise measurements, and sound design

SEGMENT: Acoustic Engineers in the Automotive, Aerospace or Defense Industry

SPEAKING TOPICS:

- Wind Tunnel Testing
- Acoustic Fatigue
- In-Flight Aeroacoustics
- Jet and Rocket Engine Testing
- Sonic Boom
- Impulsive Noise

BIO: Mr. Lars G. Winberg has more than 30 years of experience in acoustic testing and noise measurements across the Automotive, Aerospace and Defense industries. Lars' journey in acoustics began as a Technical Officer specialised in electronics and underwater acoustics in the Swedish Navy, and later as a consultant for international engineering companies. He served as the Acoustic Expert for the Government of Qatar for the establishment of Doha International Airport.

Today, he is a Product Development Manager with GRAS Sound & Vibration, where he works closely with international customers in the Aerospace and Defense industry on microphone development for acoustic test designs.
